

nipocrisy_

nipocrisy_ By censoring our bodies based on perceived gender, Instagram is participating in discrimination. Female-presenting bodies are twice as likely to be removed for “nudity” or “sexual activity” according to IG’s guidelines, effectively perpetuating the patriarchal idea that female-presenting bodies are dangerous, obscene, sexual objects without bodily autonomy.

This discrimination has serious implications: it inhibits health education, perpetuates harassment, and limits the success of artists, performers and advocates.

Until all bodies are treated equally, we are not equal.
